Clinical Reach

## Zuellig Pharma's Direct-to-Patient (DtP) Solution For Australia

### Fully Integrated Clinical Reach Service That Reduces Time, Risk & Cost

At Zuellig Pharma, we offer an innovative patient-centric approach through our Direct-to-Patient (DtP) solution that makes life easier for patients and their caregivers. With our fully integrated clinical trial management solution, we conduct Decentralized Clinical Trials (DCT) that are conducted at locations outside of the investigators' sites (e.g., patient's home, work place or travel destination).

We offer 3 types of DtP:

Depot to Patient

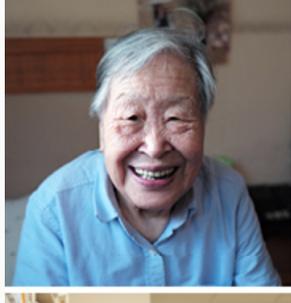

Site to Patient

Direct from Patient

## BENEFITS OF DIRECT-TO-PATIENT

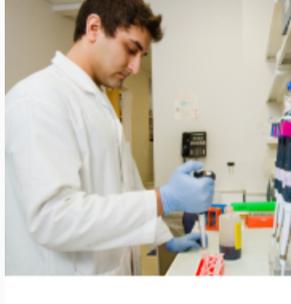

### FOR THE PATIENT

- ✓ Reduces travel time to site
- ✓ Reduces inconvenience with fewer clinical visits needed
- ✓ Especially helpful for patients who have difficulties visiting sites

### FOR THE SITE

- ✓ Reduces the number of visits to clinical healthcare sites
- ✓ Reduces facilities management
- ✓ Retain patient for clinical trial, because with DtP support, it reduces the number of patients withdrawing from trials

### FOR THE SPONSOR

- ✓ Higher retention rate
- ✓ Improves recruitment rate and time
- ✓ Improves access to a wider patient base further away from sites
- ✓ Reduces clinical trial costs

## WHY USE OUR DtP SOLUTION

1. We ensure the integrity of your products until the last mile with the use of reusable cold-chain packaging systems. This is essential for medications that require specific temperature control throughout all points of distribution.

2. In Australia, our registered and fully integrated on-site pharmacy provider allows us to directly support the Principal Investigator and Study Coordinator with a clinical trial pharmacy service. All medications are labelled and dispensed by us. There's no need to outsource to another third party pharmacy, thus reducing costs.

3. With our patient-centric approach, we contact each patient to personally explain drug information. At all times, patients have direct access to our pharmacists if they have any questions.

## ROLES OF OUR DtP PHARMACISTS

- Understand drug information
- Provide information to patient
- Explain process to site
- Manage drug supplies
- Retain original prescriptions
- Prepare DtP instructions for depot
- Explain role of DtP pharmacy to patient
- Review each dispensed order
- Follow up with patient after delivery
- Train depot staff and pharmacists

## HOW DtP HELPS DURING COVID-19

Since the advent of the COVID-19 pandemic, clinical trials can be even more challenging to run. With our years of experience in Clinical Reach, we understand the complexities involved in running clinical trials. Through our Direct-to-Patient (DtP) solutions, we are able to support our clients by continuing to extend clinical trials services to patients during the pandemic.

### Contact Us To Learn More

Zuellig Pharma Specialty Solutions Group operates one of the largest and most comprehensive clinical trial support networks in Asia, spanning 15 countries. Having supported more than 2,000 clinical trials, we have drawn on our network and infrastructure in Asia to help clients bring new healthcare innovations to market quickly and cost-effectively.
